

METAL/WOOD SWIVELING ROOF ANCHOR

VERSATILE ANCHOR FOR FLAT OR SLOPED WOOD AND METAL DECKING

TRUSTED, QUALITY FALL PROTECTION

PRODUCT SHEET

360 DEGREE ROTATION

PROVIDES MAXIMUM MOBILITY

Performance and Value

The Protecta® Metal/Wood Swiveling Roof Anchor is designed to be a removable and reusable anchor for residential or commercial wood and metal frame structures. The rugged design is durable and can withstand the rigors of use from jobsite to jobsite.

- Allows for 360 degree rotation and unrestricted access on rooftops
- Portable and reusable design provides added versatility
- Can be installed on a flat or sloped roof
- Meets the latest OSHA and ANSI standards

Easy to Install and Maintain

Wood Roof Frame

- 1) Position anchor on roof so eight of the lag screw holes are centered over a roof (framing) member
- 2) Install eight 1/4-14 x 2-1/2-inch or longer lag screws

Metal Roof Frame

- 1) Place wood spacers in troughs of decking material to allow anchor to sit level
- 2) Position anchor on roof so eight screw holes line up with center of the top flange of the Z-purlin
- 3) Install eight 1/4-14 x 2-1/2-inch self-drilling screws

Steel Decking

- 1) Place wood spacers in troughs of decking material to allow anchor to sit level
- 2) Position anchor on roof so eight screw holes line up with center of a decking rib
- 3) Install sixteen 1/4-14 x 2-1/2-inch self-drilling screws (8 in each direction)

Dismantling - To remove, unscrew the lag screws and remove from the roof. The roof anchor is removable and designed to be reinstalled following inspection

Important: See User Instruction Manual for Detailed Instructions

Swiveling Design

Allows for 360 degree rotation and unprohibited movement

Universal Bracket

Accommodates most self retracting lifelines

Self Retracting Lifeline

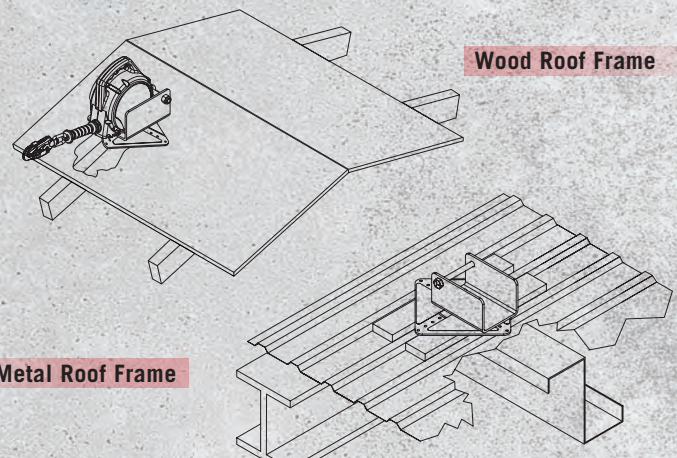

Provides easy to use full protection for a large work area, must order separately
