CB Anchors are suitable for the following applications:

Personal Fall Arrest: CB Anchors may be used in Personal Fall Arrest applications to support a MAXIMUM 1 PFAS. Structure must withstand loads applied in the directions permitted by the system of at least 5,000 lbs. Maximum allowable free fall is 6', unless used in combination with equipment explicitly certified for extended free fall of up to 12'. Applicable D-ring: Dorsal.

Restraint: CB Anchors may be used in Restraint applications. Restraint systems prevent workers from reaching the leading edge of a fall hazard. Structure must withstand loads applied in the directions permitted by the system of at least 1,000 lbs. No vertical free fall is permitted. Restraint systems may only be used on surfaces with slopes up to 4/12 (vertical/horizontal). Applicable D-rings: Dorsal, Chest, Side, Shoulder.

Work Positioning: CB Anchors may be used in Work Positioning applications. Work Positioning systems allow a worker to be supported while in suspension and work freely with both hands. Structure must withstand loads applied in the directions permitted by the system of at least 3,000 lbs. Maximum allowable free fall is 2'. Applicable D-rings: Side, Shoulder.

Confined Space/Rescue: CB Anchors may be used in Confined Space/Rescue applications. Confined Space/Rescue systems are those capable of recovering a worker from a confined location or after they are exposed to a fall. Structure must withstand loads applied in the directions permitted by the system of at least 3,000 lbs. No vertical free fall is permitted. Applicable D-rings: Dorsal, Chest, Shoulder.

For all applications: worker weight capacity range (including all clothing, tools, and equipment) is 130-420 lbs.

Materials: galvanized steel or powder-coated steel.

MAXIMUM 1 connection per CB Anchor.

Suitable for use in combination with HLL System. HLL systems must be designed, installed, and used under the supervision of a Competent Person.
